Education

University of Mindanao

Bachelor of Science in Computer Science

2023 – Present

Relevant Coursework: Artificial Intelligence, Machine Learning, Natural Language Processing (NLP), Deep Learning, Modeling & Simulation, Software Development, Flutter Development, Web Development.

Summary

Motivated Computer Science student with hands-on experience in full-stack web development, software engineering, and modern application development. Skilled in building responsive web applications, modular systems, and real-world projects using modern frontend and backend technologies. Continuously improving technical expertise through academic and personal projects.

Projects

HR Management System (HRMS) | *JavaScript, HTML, CSS, LocalStorage*

Frontend Developer | Academic Team Project

- Developed a modular employee management system with CRUD functionality and reusable UI components.
- Implemented employee management workflows including editing, removing, sorting, and record management.
- Organized the project using modular JavaScript architecture for scalability and maintainability.

Focus Quest – Productivity RPG App | *React, Next.js, Tailwind CSS*

Full-Stack Developer | Personal Side Project

- Built a productivity application where tasks become quests and users gain experience points.
- Designed gamified task systems and responsive UI/UX components.
- Focused on scalable frontend architecture and user interaction systems.

Mediapipe Finger Tracking System | *Mediapipe, WebSockets, JavaScript*

Developer | Experimental Side Project

- Created a browser-based interaction system using real-time hand and finger tracking.
- Controlled HTML elements dynamically through webcam input and gesture recognition.
- Explored computer vision concepts and real-time communication technologies.

Baylora Application | *Next.js, Supabase, Tailwind CSS*

Full-Stack Developer | Personal Project

- Developing a modern application focused on responsive design and scalable architecture.
- Integrated backend services and database systems for dynamic application functionality.
- Focused on UI/UX improvement and real-world development practices.

Technical Skills

Programming Languages: JavaScript, Python, Dart, HTML5, CSS3

Frontend Development: React, Next.js, Tailwind CSS, GSAP

Backend Development: Node.js, Express.js, FastAPI, REST APIs

Mobile Development: Flutter

Databases & Backend Services: MySQL, Firebase, Supabase

Deployment & Cloud Platforms: Vercel, Netlify, Render

Tools & Technologies: Git, GitHub, VS Code, Figma, WebSockets, Mediapipe

Experience

Student Developer & Independent Project Builder

2023 – Present

- Built multiple academic and personal software projects using modern web technologies.
- Practiced full-stack development through real-world applications and side projects.
- Learned deployment workflows using Vercel, Netlify, and Render.
- Continuously improving backend integration, frontend systems, and software engineering skills.

Strengths

Problem Solving • Fast Learner • Team Collaboration • Adaptability • UI/UX Awareness • Self-Motivated
